Roger...long time ....I thought I'd send this to you as I really think it would be of interest. You may like to know that our group (renamed Environmental Affairs) is looking with much greater focus at some of the many broad global issues and trying to ensure that the corporation is listening to what is happening in the world outside on issues of Sustainability, etc. This is one of our communications activities and I know it would be right up your street - remembering some of our previous discussions.

If you can get here for it that would be great - perhaps it'll also give us a chance to chat as well.

  
e Corporate Affair  
Strategy...

All the best...Colin
